

Epilogue, ISAIA 2018

The 12th International Symposium on Architectural Interchanges in Asia (ISAIA 2018) was held successfully for four days from October 23 to 26, 2018 in Alpensia Resort Convention Center in Pyeongchang, Korea. It was organized by the Architectural Institute of Korea (AIK), and jointly hosted by the Architectural Institute of Korea(AIK), the Architectural Society of Chin (ASC), and the Architectural Institute of Japan (AIJ).

Next day, architects Jeong Hoon LEE, Hoon MOON, Chanjoong KIM delivered their speeches Material_Metry : Interpretation of Materials as a Geometric Unit of Measurement and the Semantic Reconstruction of a Site, Doodle Constructivism, and Context Driven Architecture in Korea. The keynote speeches attracted much attentions and received a lot of applause from participants.

Also, there were two special sessions (Reunification : Preparation for the Reunification of Korean Peninsula Focused on Architecture, Urban Issues Including Infrastructure / Smart City : Making a Good City with Utilizing Cutting Edge Technology) during the symposium and 7 speakers and panel members participated the session.

Young Architects' Design Session was organized for young architects and designers in Asia to share and exchange their works and ideas for the first time. 46 design works were exhibited and 15 selected design works were presented during the Pecha Kucha session.
